CAREER SUMMARY

Fullstack Developer with 1+ years of experience specializing in high-performance Node.js/Nest.js architectures and Generative AI integration. Proven track record of building RAG-based applications and scalable real-time systems. Currently pursuing MCA, focused on bridge-building between modern AI capabilities and robust backend engineering.

PROFESSIONAL EXPERIENCES

Viithiisys Technologies | FullStack Developer

August 2025 - present

- Architected and deployed a Retrieval-Augmented Generation (RAG) pipeline using Node.js and OpenAI, enabling semantic search capabilities and real-time AI-driven news summarization for a high-traffic news platform
- Engineered a Personalized News Feed algorithm that utilizes user behavior patterns and embeddings to deliver custom content.
- Added Functionality of Ai news search, Personalized news Feed, Ai summary etc.

Freelance FullStack Developer

September 2024 - present

- Architected a high-concurrency tracking dashboard using Node.js and WebSockets, enabling live telemetry streaming for hundreds of aircraft.
- Engineered location-aware features using Google Maps Geolocation APIs to provide dynamic, distance-based pricing and localized search results
- Spearheaded the integration of secure payment gateways (Stripe/PayPal), ensuring PCI-DSS compliance and supporting multi-currency transactions for a global user base.

PERSONAL PROJECTS

Swift – Full-Stack Website Builder Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, TypeScript, Tailwind CSS

- Engineered a scalable website builder platform (**Swift**) with a modern MERN + TypeScript stack.
- Enhanced user experience by optimizing rendering performance and implementing robust catalog management features.

Azhan – Fully functional Banking application

Tech Stack: Next.js, Node.js, NextAuth, MongoDB, TypeScript, Tailwind CSS

- Improved page load speed with server-side rendering optimization.
- Implemented search, filtering, and sorting functionalities within a comprehensive product catalog.

File Sharing Application

Tech Stack: Node.js, WebRTC, WebSockets, React.js

- Developed a responsive interface and built a signaling server using WebSockets for real-time communication.
- Transferred 100 mb file, improvement in speed.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Angular.js, Javascript, Typescript
- **Backend:** Node.js, Nest.js, Express.js, Python, GraphQL, RESTful APIs
- **Databases:** PostgreSQL, MySQL, MongoDB, ChromaDb, Pinecone
- **Tools:** Redis, kafka, Ai Apis
- **Deployment:** Docker

EDUCATION

Bachelor's Degree in Computer Application — 2022 - 2025

Pursuing Masters Degree in Computer Applications — 2025 - present
